

ABHISHEK UMESH HOSAMANI

Software Engineer · Generative AI Developer · LLM Application & Backend Systems
+91 8431406956 · <mailto:abhishekhosamani522@gmail.com> · [LinkedIn](#) · [GitHub](#) · Belagavi, Karnataka, India

PROFESSIONAL SUMMARY

Software Engineer with hands-on experience building production-ready web applications, AI-powered systems, REST APIs, and scalable backend architectures. Experienced in Python, React, PostgreSQL, cloud deployment, and Generative AI technologies. Built and deployed real-world products including LLM applications, automation platforms, and full-stack web applications. Strong foundation in software engineering principles, API development, system design, and cloud-native application architecture.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, SQL

Frontend Technologies: React.js, HTML, CSS

Backend Development: FastAPI, REST APIs, API Integration, JSON Processing, CRUD Operations

Databases & Data Engineering: PostgreSQL, Supabase, Pinecone Vector Database, Google BigQuery, Database Schema Design, NoSQL Databases

Generative AI & Machine Learning: LLMs, RAG, Prompt Engineering, AI Agents, OpenRouter API, AI Workflow Automation, Vector Embeddings, Semantic Search, AST-Based Code Chunking, Scikit-Learn

Software Engineering: Microservices Architecture, Design Patterns, Object-Oriented Programming (OOP), System Design Fundamentals, Agile Development

Data Analytics & Visualization: Power BI, Tableau, Advanced Excel, Pandas, NumPy, Data Cleaning, CSV/JSON Processing

EXPERIENCE

AI Engineer Intern · Inera Software | Remote, India

Dec 2025 – Present

- Building production LLM applications and RAG-powered chatbots using Pinecone vector embeddings and Supabase PostgreSQL for intelligent, context-aware response generation.
- Designing backend AI pipelines with Python, REST APIs, and N8N workflow orchestration; implementing structured prompt engineering and AI automation systems.
- Deploying scalable AI applications to cloud platforms (Vercel, Render) with full environment configuration, API integration, and backend management.

Data Science Intern · Xcel Corp | Belagavi, India

Feb – Mar 2025

- Developed a Breast Cancer Prediction ML model achieving 92% accuracy on 10,000+ records using Scikit-Learn; applied feature engineering and ROC/Precision/Recall evaluation metrics.

Workshop Conductor – Data Analytics · NIIT | Gadag, India

Apr 2025

- Delivered a 2-day hands-on workshop to 120+ students on Data Analytics, Advanced Excel, and Power BI dashboard creation.

PROJECTS

GitChat – Conversational AI GitHub Repository Analyzer

[\[GitHub\]](#)

- Built a Generative AI web app for querying GitHub repositories using RAG architecture — AST-based code chunking, Pinecone vector storage, and LLM-powered responses via OpenRouter API.
- Implemented Supabase PostgreSQL backend for project/session management; deployed to production with cloud hosting and full backend integration. Developed and integrated REST APIs using FastAPI.

AI Resume Analyzer – LLM-Based ATS Evaluation Platform

[\[GitHub\]](#)

- Developed an LLM-powered resume evaluation platform using OpenRouter API and Prompt Engineering to score resumes against JDs with ATS-compatibility analysis, keyword gap detection, and improvement recommendations.
- Integrated resume-builder templates with dynamic content generation, document parsing, structured AI feedback, and Supabase backend for user data management. Developed and integrated REST APIs using FastAPI.

Valentine's Campaign Platform – Production Full-Stack Web App

[\[GitHub\]](#)

- Deployed a production full-stack platform with Supabase PostgreSQL and Razorpay payment gateway; generated ₹7,980 in real customer revenue.
- Engineered end-to-end backend architecture with real-time order management, CRUD operations, transaction processing, and AWS S3-powered media storage for user-uploaded assets via REST APIs, supporting production-scale deployment.

Affiliate Marketing Automation Platform

[\[GitHub\]](#)

- Developed a Python-based affiliate marketing automation platform integrating Instagram, Telegram, and Pinterest APIs, leveraging AWS Lambda and Supabase for serverless content generation, data storage, and automated multi-channel publishing; deployed on Vercel and Render.

ACHIEVEMENTS & RECOGNITION

- Winner – National Science Day Next Gen Expo 2025:** Secured 1st place for innovative project presentation and technical demonstration.
- Winner – Magnum Opus Project Exhibition:** Recognized for outstanding technical project execution and presentation.
- Runner-Up – Hackathon Competition:** Achieved 2nd place in an inter-college coding/problem-solving hackathon.
- Invited as Chief Guest – Youkti 2K26, VTU Belagavi:** Invited for mentoring and addressing participants at the coding event.

EDUCATION

Bachelor of Computer Applications (BCA) · KLS Gogte College of Commerce, Belagavi Expected 2026 · CGPA: 7.3
12th Commerce – Karnataka State Board · Gogte College of Commerce 2023 · 91.33%

CERTIFICATIONS

Google Cloud Data Analytics (Google) · Data Analytics (NIIT) · Power BI (Office Master) · UI/UX Design (Kalpas Innovation)
