

ABHISHEK UMESH HOSAMANI

Software Engineer · Backend Engineer · AI/Cloud Developer

+91 8431406956 | abhishekhosamani522@gmail.com | [LinkedIn](#) | [GitHub](#) | Bengaluru, Karnataka, India

PROFESSIONAL SUMMARY

Software Engineer with 9 months of hands-on experience building scalable cloud-based backend services, RESTful APIs, and database-driven applications using ASP.NET Core, C#, Python, FastAPI, SQL Server, and PostgreSQL. Strong foundation in object-oriented programming (OOP), client-server architecture, software development lifecycle (SDLC), Agile methodologies, authentication, authorization, and database design. Experienced in developing secure, reliable, maintainable, and high-performance applications while following modern software engineering best practices.

TECHNICAL SKILLS

Programming Languages: C#, Python, JavaScript, SQL

Backend & APIs: ASP.NET Core Web API, FastAPI, REST APIs, JWT Authentication, OAuth 2.0, Role-Based Access Control (RBAC), Entity Framework Core, Dependency Injection, Repository Pattern, CRUD Operations, API Integration

Databases: SQL Server, PostgreSQL, Supabase, Database Schema Design, NoSQL Databases, Pinecone Vector Database

Frontend Technologies: React.js, Node.js, Streamlit, TypeScript, HTML5, CSS3, Tailwind CSS

Software Engineering: Object-Oriented Programming (OOP), Client-Server Architecture, Design Patterns, Layered Architecture, SDLC, Agile Development, Microservices Architecture, Code Reviews, Debugging, Performance Optimization, Scalability

Cloud & DevOps: AWS S3, AWS Lambda, Git, GitHub, Continuous Integration (CI), Continuous Deployment (CD), Infrastructure as Code (IaC)

Testing: Unit Testing, Integration Testing, API Testing

Generative AI & Machine Learning: LLMs, Retrieval-Augmented Generation (RAG), Prompt Engineering, AI Agents, OpenRouter API, AI Workflow Automation, Vector Embeddings, Semantic Search, AST-Based Code Chunking, Scikit-Learn

Currently Learning: Kubernetes, Cloud-Native Development, Microservices

EXPERIENCE

AI Engineer Intern · Inera Software | Belagavi, India

Dec 2025 – May 2026

- Developed scalable, secure cloud-based backend services and RESTful APIs using ASP.NET Core, following client-server architecture, OOP, and Agile software development practices.
- Designed and optimized PostgreSQL and Supabase database schemas supporting secure CRUD operations, efficient data retrieval, and scalable backend applications.
- Implemented AI-powered backend workflows and automation solutions to streamline business processes and improve operational efficiency.

Software Engineering Intern · Xcel Corp | Belagavi, India

Feb 2025 – May 2025

- Developed and maintained backend services for a data processing application using Python and PostgreSQL, implementing REST APIs, CRUD operations, and database schema optimizations.
- Collaborated in an Agile development environment, participating in requirements gathering, code reviews, testing, and debugging to ensure software quality.
- Performed unit testing, API validation, debugging, and issue resolution to ensure reliable software before deployment.

PROJECTS

Shopi – AI-Powered E-Commerce & Merchant Intelligence Platform

[Live](#) – [GitHub](#)

- Developed a full-stack AI-powered e-commerce platform enabling customers to discover products, search and compare offerings, receive personalized recommendations, manage carts, complete checkout, and track orders.
- Built merchant intelligence capabilities analyzing customer behavior, conversion, CLV, retention, product performance, and cart abandonment to support data-driven business decisions.

GitChat – Conversational AI GitHub Repository Analyzer

[Live](#) – [GitHub](#)

- Developed a cloud-based Generative AI application for querying GitHub repositories using Retrieval-Augmented Generation (RAG), Pinecone Vector Database, and OpenRouter LLM APIs.
- Developed and integrated FastAPI REST APIs with Supabase PostgreSQL for project and session management, deploying the application to a cloud-hosted production environment.

Valentine's Campaign Platform – Production Full-Stack Web App

[Live](#) – [GitHub](#)

- Developed and deployed a production full-stack platform using Supabase PostgreSQL, AWS S3, and Razorpay payment integration, generating ₹7,980 in customer revenue.
- Engineered scalable backend services using RESTful APIs, CRUD operations, transaction processing, PostgreSQL, and AWS S3, supporting secure production deployments.

AERS – AI-Powered Employment Readiness Platform In Development

[Live](#) – [GitHub](#)

- Developed a mobile-first employment readiness platform for final-year students, implementing a structured 16-week learning journey with assessments, activities, progress tracking, and personalized learning workflows.
- Built an AI-powered chat feature that enables students to interact with the platform and receive contextual guidance throughout their employment-readiness journey.

ACHIEVEMENTS & RECOGNITION

- Winner – National Science Day Next Gen Expo 2025: Secured 1st place for innovative project presentation and technical demonstration.
- Winner – Magnum Opus Project Exhibition: Recognized for outstanding technical project execution and presentation.
- Runner-Up – Hackathon Competition: Achieved 2nd place in an inter-college coding/problem-solving hackathon.
- Invited as Chief Guest – Youkti 2K26, VTU Belagavi: Invited for mentoring and addressing participants at the coding event.

EDUCATION

Bachelor of Computer Applications (BCA) · KLS Gogte College of Commerce, Belagavi — 2026 · CGPA: 8.2
